

# ACHIEVE 20 TO 40% LONGER LIFE

Cat<sup>®</sup> HDXL with DuraLink<sup>™</sup> For D6 & D7

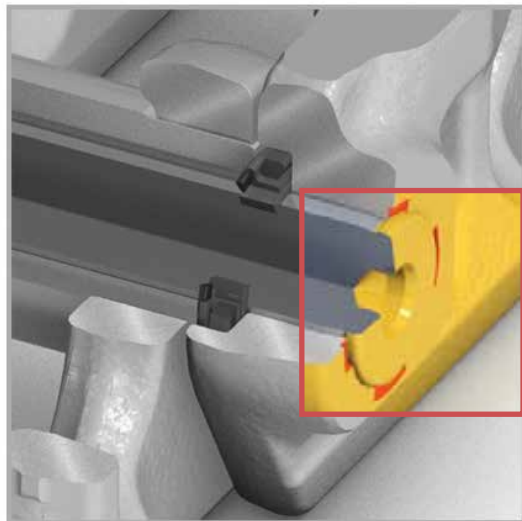

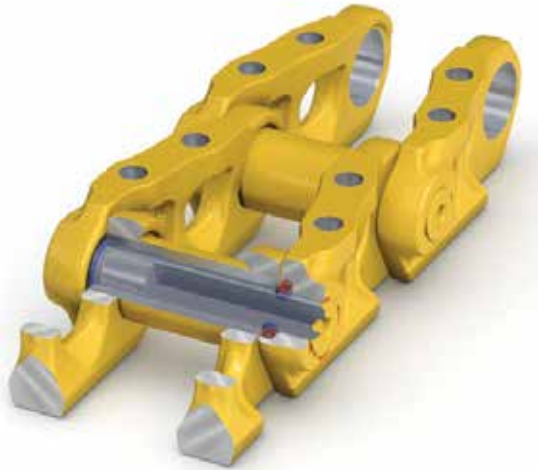

## TOUGH TRACK FOR TOUGH JOBS

Designed for maximum durability, field proven Cat<sup>®</sup> heavy duty track plus the field proven Positive Pin Retention 2 (PPR2) combine to create Cat Heavy Duty Extended Life (HDXL) with DuraLink. The improved life handles your most demanding terrain without breaking. **DuraLink** has features and benefits specific to machine size.

HDXL with DuraLink is specifically engineered to match the requirements of medium-size machines with an elevated sprocket operating in demanding work environments. The link assembly mechanically locks the link to the pin to resist pin walking and link cracking for reliable sealing and maximum track life.

## PATENTED CATERPILLAR DESIGN

Get the most out of your undercarriage with Custom Track Service from your Cat dealer.

**HDXL with DuraLink can extend your undercarriage system life in aggressive, high-impact applications such as:**

- Logging/reforestation
- Side-sloping work
- Rocky conditions
- Any uneven terrain with wide track shoes

**Benefits realized compared to general duty track:**

- Greater bushing retention
- Deeper heat-treat
- Upgraded link increases strength by eliminating cracking and spalling
- Increased pin and bushing retention
- Larger bolt improves shoe retention in severe applications

**Cat PPR2 Track:**

PPR2 is an exclusive Caterpillar offering that mechanically locks the link to the pin.

- Resists end-play generation and link movement on the pin
- Tightly controls seal motion for long internal pin/bushing wear life
- Resists fatigue and crack formation with redesigned, stronger track links
